Leading The Way

Title VII of the Civil Service Reform Act (CSRA) of 1978 authorized the U. S. Office of Personnel Management (OPM) to permit federal agencies to conduct demonstration projects to determine if changes in personnel management policies or procedures would result in improved federal personnel management and increase management control of personnel functions. The first project approved and implemented was the Navy's joint Demonstration Project, developed initially at the Naval Ocean Systems Center San Diego and the Naval Weapons Center (NWC) China Lake and now implemented at the Space and Naval Warfare Systems Command (SPAWAR).
